

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

We used to receive as many as 5 calls or more in an evening. I had sent requests to many to have our name and phone number removed from their lists. Of course they all said they would but I never noticed any improvement. I have really enjoyed the peace since the Indiana Telephone Privacy Act took effect and sincerely hope you will do nothing to reverse the good it has brought about. If I want more information about a product or service, I will do my own research. I do not want or need to be constantly bombarded by telephone sales persons.
